

0. General Information

0.1 Scope

The German Military Flight Information Publication Maps and Charts (GEMIL FLIP MAP) contains Special Charts of military used airspaces within the Federal Republic of Germany. It is designed for use with the corresponding aeronautical charts, the AIP Germany and the MIL AIP Germany.

Detailed information about Refuelling Areas and LANIA are laid down in a letter of agreement between DFS Deutsche Flugsicherungs GmbH (DFS), German Air Force Command (GAFCOM) - Tactical Air Command and Control Service (TACCS) and the Bundeswehr Air Traffic Services Office (AFSBw).

0.2 Units of Measurement

Altitudes and elevations are expressed in feet above mean sea level (MSL) unless indicated otherwise. Courses, headings, radials and bearings are magnetic.

Distances are expressed in nautical miles.

0.3 Amendment Service

GEMIL FLIP MAP will be produced and published on a revision cycle of 168 days. Changes and revisions to maps and charts, which become effective at short notice, are published by NOTAM Class I Series U.

New maps and charts, which become effective between the publication cycles, may be published by MIL AIP Supplements (MIL AIP SUP) attached to the regular amendments of MIL AIP Germany.

Amendment requests have to be reported to:

Amt für Flugsicherung der Bundeswehr
Dezernat II 2 - Luftfahrtveröffentlichungen
Insterburger Straße 4 - 6
60487 Frankfurt am Main
